

Visual Tracking: Enhanced Battlefield Awareness and Change Detection

Modern Techniques to an Ancient Skill

VisTA Tracking Services unique methods of tracking and training are designed to teach visual tracking in an efficient and effective manner by utilizing everyone's natural perceptual abilities.

Visual tracking applied in a military context has historically been referred to as Combat Tracking which is still often taught by others in a simplistic manner. Visual tracking allows a person trained to often determine the number, direction, time, and activity of a person at a given place and to anticipate or predict possible future activity. VisTA Visual Tracking is a more effective form of what is often termed "combat tracking". VisTA Visual Tracking courses merge enhanced visual tracking skills and observation as a non-intrusive method of shoe and footprint, tire tracks, and gait analysis to identify individuals and insurgent networks involved in IED and other attacks. VisTA Visual Tracking courses can be an extremely effective technique to utilize during pursuit operations which is taught during VisTA Courses.

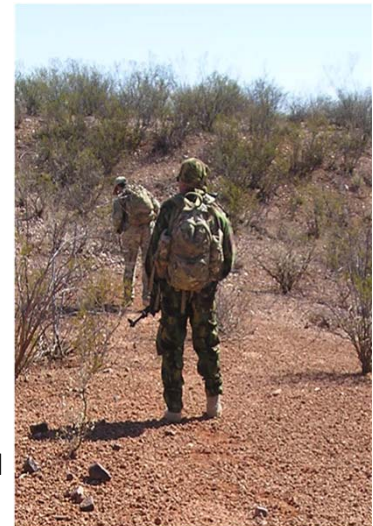

Visual Tracking training teaches you the art of observing, understanding, and knowing your environment.

Visual Tracking increases:

- Increased Force Protection
- Greater Awareness For Village Stability Operations
- Perceptual Abilities
- Interpretation and exploitation of IED/EH and Ambush Sites

Visual Tracking Class Topics:

- Applications of Visual Tracking
- Track and Sign Visual Indicators
- Trackers Posture/Tracking Flow Drill
- Individual Tracking methods
- Track Analysis and Interpretation
- Sign Recovery Techniques to Find Track and Sign
- Tactical Applications of Visual Tracking

To Schedule Training:

Call VisTA Tracking
